41st Year, No. 7.

VULCAN, ALBERTA, THURSDAY, SEPTEMBER 24, 1953.

Subscription \$2.50 a year in advance.

## EDMONTON REPORT

EDMONTON: Vying with British Columbia's Doukhobors last week to provide the biggest news stories out of western Canada was the Canadian Chamber of Commerce, which held its annual convention in Alberta's capital.

Attendance of more than 500 delegates, including the stars of Canada's business, industrial and economic circles assured the chamber of providing news of greater nationwide significance than skin-loving, firebugs of the Kootenay. It was significant because their deliberations and decisions are followed closely by federal and provincial governments as well as other sections of the Canadian community.

Throughout the three days of general sessions it was to be noted the emphasis placed on the importance of western agriculture and the part huge grain crops are playing in Canada's economy. It figured in both the discussions of the country's business outlook and its role and future in world trade.

Alberta's rural communities and, for that matter, its principle cities actually don't have to be told that whether or not the farmer can sell his wheat its effects will make themselves known in the general economic picture.

Chamber speakers did not seem to think it was the farmer who must puzzle his way out of difficulties, but rather the solution lay in national and international policies. Take Maj. H. G. L. Strange, Searle Grain Co. research director, for instance.

Member of the convention's panel discussing world trade, he classed farmers as instinctive free traders. Why? He said the farmer realizes that to be able to sell his surplus wheat and other products to foreign countries depends on the quantity of goods and services these countries can and are permitted to sell to Canadians, at prices competitive with Canadian-made goods.

Of course, the reason is that before the foreign countries can buy the foodstuffs they need from Canada, they must have dollars. They can only get them by exporting their products to this country, Maj. Strange said.

His solution will be viewed as drastic and overly-optimistic in many quarters. He suggested that Canada lead the way demolishing its import barriers by reducing tariffs by 20 percent a year for the next five years. He believes it is an example other countries would follow.

Whether Maj. Strange's suggested policy is workable or not, the need for increased export of wheat particularly also was emphasized in an interview by United Grain Growers President J. E. Brownlee, who was attending the chamber convention.

As the congestion problem in the 1940's was deflated by sales, so increased export sales is the great hope now.

The alternative, if the big surpluses built up in three years of large crops are not going to be left to deteriorate, is the expenditure of considerable money for more storage space, he felt.

There were many predictions of a levelling off of business activity next year and the convention heard suggestions that 1954 would be a time of consolidating the gains of the past several years.

Not taking place during the four days of the convention, but a highlight of the exodus of delegates from eastern Canada, was a special train trip to Alberta's Peace River country. On the return trip to the east, the special train, bearing more than 100 delegates, stopped for visits at one or two central and southern Alberta rural centres.

By the time the eastbound special crossed the Alberta-Saskatchewan border the delegates had spent more than a week in the province, not only listening to speeches but learning about the province from Albertans.

## Honor Dead of Two Wars

### Decoration Day Service Conducted at Cemetery

Decoration Day was observed in Vulcan by the local branch of the Canadian Legion, with Rev. J. C. E. Reuss, the chaplain, assisted by Revs. E. J. Clarke of the United Church, conducting memorial services for those who died in two World Wars.

Mr. Reuss paid tribute to the sacrifice made by the men who are buried in the local Field of Honor and to the men of both wars who lie in cemeteries in many parts of the world.

Prayers were offered by Mr. Clarke and Mrs. Reuss and suitable hymns were sung. Joining in the prayers and songs were members of the Legion branch and Auxiliary, and a few friends who were present.

The Field of Honor, freshly mown and trimmed by Legion members, was decorated with the flags of the branch and many lovely fresh flower wreaths and bouquets provided by the Auxiliary members. Photos were taken of the graves, especially for the next-of-kin of the men from the Old Country who are buried here.

## Grass and Legume Mixture For Hay

The value of a good cultivated grass and legume mixture for hay production cannot be refuted. It has been time tested and proved in experimental plots and in large scale fields that the inclusion of alfalfa in a hay field will usually double the total hay yield. This principle of doubled production through the inclusion of a legume has an almost limitless field of application and the drier regions of the western prairie provinces are no exception.

There are other factors also, such as the kind of mixtures and seeding methods which will have an effect on the potential hay crop. Experiments and field trial comparisons, says M. R. Kilcher, Experimental Station, Swift Current, Sask., have shown that under the growing conditions of the drier prairie area, forage crops will produce more for a longer period of time if seeded in 12-inch spaced rows instead of rows which are 6 inches apart. For this same area late fall seeding has proved a little better than spring seeding. Fall seeding will permit early spring germination and the young plants will use the initial spring moisture to advantage.

Although there is a free choice of grass-legume mixtures, it can be said that a standard dryland mixture of crested wheat grass, brome grass, and Ladak alfalfa has the widest application. This grass-alfalfa mixture should be seeded at about 8 pounds per acre, in 12-inch spaced rows and be made up of 4 pounds brome grass, 2 pounds crested wheatgrass, and 2 pounds Ladak alfalfa. Depth of seeding should not exceed one inch.

A good substitute for brome grass is intermediate wheatgrass. There is little difference in the performance of the two grasses, but intermediate wheatgrass is perhaps a little easier to establish. The crested wheatgrass component

## SERVICE BOARD NOTES

H. S. Burns, Field Supervisor

Cow Cockle is an annual weed that is becoming a nuisance on some farms in Vulcan County, and it is well that everyone should become acquainted with this weed as it is very hard to eradicate when once it becomes established. It flowers in June and July and seeds in July and August. It has a pink flower and does not respond readily to 24D and seems to scatter and get over quite an area in a very short time. The seeds are apt to be distributed from one farm to another with the seed cleaning process unless great care is exercised in cleaning the plant at each farm before moving on to the next.

The seeds are round, brown-black in color, quite large and are hard to separate from wheat, consequently they cause considerable dockage, but worse still some elevators are having to reject grain that is infested with the seeds. It is also ranked as poisonous to livestock when fed with screenings, especially chickens. Due to the many bad qualities of this weed it is well for every one to recognize it and be on the alert for it. We have a specimen in our office that can be seen at any time.

ent will, under dry conditions, eventually crowd out the other grass and alfalfa. To offset this crowding out action, only 2 pounds crested wheatgrass is recommended as compared to 4 pounds brome. Even at this rate crested wheatgrass will eventually take over but complete dominance of the stand will take longer and, in the meantime, a higher level of production may be maintained.

Stubble land seeded in the late fall, or summerfall land seeded in the spring. Make the best seed beds for grasses and legumes. Under no conditions should summer-fallow land be seeded in the fall because water erosion and soil baking may result in complete failure. Spring seeding should be done as early as possible and if the summerfallow is too loose after it has been worked up it is advisable to pack it down firmly before seeding. It will be clearly realized that late fall seeding in stubble will eliminate many of the hazards of spring seeding.

A grass legume stand cannot be harvested during the first growing season. After this one year of protection, however, a good stand of the mixture can be expected to produce good hay crops for 6 to 8 years after which time it may be wise to break up the field, crop it for a year, and reseed to a forage mixture.

Canada's exports of forest products are ten per cent more valuable than her exports of agricultural and vegetable products.

Logs that could never make any thing but poor lumber are the chief raw material of the pulp and paper industry of Canada.

## Planning Better Aviation for Central America

In Central America, like many other parts of Latin America, the aircraft has become the only dependable transportation. The age of railroads and motor cars has been skipped over. Because of its essential character, Central American countries have asked for technical advice through the United Nations. Here, officials in El Salvador discuss plans for making the busy San Salvador airport a free, international field with Glen Gilbert, an expert adviser sent by the International Civil Aviation Organization, a U.N. Specialized Agency.

## Dry Weather Needed

### Rains Delay Harvesting --Little Done This Week

Little harvesting has been done this week. Fairly general showers throughout the district last week-end brought all work to a halt, and although a few farmers have got in a day or a half-day's work since then, light showers Wednesday morning and late Wednesday afternoon again forced the combines to stop.

Combining is well underway in this area but is still not more than 25 to 30 per cent completed. Farmers, faced with the knowledge that grain being harvested now may be in storage a long time, are generally waiting until the wheat tests "dry" before combining it. Testing for moisture content is done at the local elevators.

Very few grain cars have been received at Vulcan the past two weeks and the storage situation remains acute, with all local elevators full to capacity.

## Town Now Has Police Constable

J. L. Moyer, former police constable for the town of Bassano, assumed his duties last week as police constable for the Town of Vulcan, and he and Mrs. Moyer have now taken up residence here.

Enforcement of local traffic by-laws is now being carried out and motorists who have become quite accustomed to double-parking and driving through stop signs, have been contributing a few dollars to the town treasury recently.

Constable Moyer has had 22 years experience in law enforcement work, including 18 years as a member of the B. C. Provincial Police.

## John Ware--Famous Bar U Cowboy of the Early West

(By W. Bruce Marsden)

Of the few real oldtimers still living, who were in Southern Alberta during the stirring days of the early '80s, also the many others who arrived at or around the turn of the century, and we hope the younger generation, will remember the name of a famous Bar U cowboy, who in his heyday rode the wide open spaces, broke uncountable wild broncs, started two ranches of his own, known wherever stockmen gathered together, as a top hand, the great and colourful personality—John Ware.

John Ware was still a young man when he drifted from his native Texas to the Oregon hinterlands, by way of the great cattle drives along the well defined Chisholm and Oregon Trails, he landed up there about the same time that the Bar U ranch was standing up in Alberta, in the North West Territories.

The Bar U ranch, west of High River, then known as The Crossing, was owned by the Allan line of Montreal, their first manager, who was also a partner in the enterprise, was Fred Stimson.

Stocking a large spread was quite an undertaking and the many thousands of wild range cattle ran the ranges, they had to bring in herds of stock horses from the U.S.A., and when a considerable number had been purchased by the company in Oregon, Tom Lynch was sent down there to bring them through the mountains.

Before such a dangerous trip could be accomplished, a crew of good loyal riders had to be hired. Looking around, Tom Lynch happened upon a young colored cowboy, who seemed anxious to help the crew and join the drive, so he was tested out on a bronc known to be an outlaw under the saddle, and watching John Ware closely was Tom Lynch, needless to relate he was hired on the spot, and with the rest of the crew, they trailed the horses across the mountains and up to the Bar U range.

Amongst the early stockmen who worked on the new ranch

were such well remembered men as Herb Miller, George Emerson, Tom Lynch, John Quirk, Fred Stimson (Manager), Dunc Cameron, Ab Cotterel, John Ware and many others.

The first Bar U round-up was in 1883, and before that time when the buildings were built up, they used the corrals and buildings at what is now known as the Round Top T. The late Fred Ings arrived in the district about that period and later operated the Rio Alta ranch nearby, he also rode as a cowhand for the great ranch. After his retirement, he wrote for posterity, many interesting yarns and articles covering the whole subject from first hand knowledge, including the round-ups, and the personnel of the different outfits in the foothills district. So, John Ware became one of the old originals and one of their best beloved riders known and respected by all those who forked a bronc, as a fearless buckaroo, a fine athlete and friend.

John first saw the light of day in the city of Fort Worth, the hub of the cattle industry in the Lone Star State of Texas. As a lad he had helped a local racing stable, handling colts prior to their track education, and thereby soon became a fine horseman, and in that early day most young men longed for the free and easy life out in the wide open spaces, with monetary considerations a second thought, living the carefree and adventurous life of the cowboys. A magnet drew him away from his old home and eventually he joined a herd making up for the tortuous drive overland to pastures up North, where the railroads were building into the Great American plateau pushing their steel ever West towards the Pacific coast. As towns built up, and the cattle markets in the East became easier to get to, the herds became numerous, their destinations being these towns from where their stock were shipped to the packing

(Continued on Page 7)

## Concern Over Lomond Crossing

### "Several Years" Before Level of Lake Is Raised

The projected raising of the level of Lake McGregor has given rise to some concern regarding a crossing over the lake at what is known as Lomond Crossing. The present bridge provides the only direct route from Lomond west to Vulcan.

This matter has been taken up by the Vulcan District Board of Trade through the local Member of Parliament, E. G. Hansell, who has received the following information from Ottawa.

P.F.R.A. authorities advise that when the Bow River Project is fully developed the water level in Lake McGregor will be raised to an elevation which will put the water several feet over the Lomond crossing. However, it will not be necessary to raise the level of the lake for several years, as interim plans have been made to provide the extra storage in the Travers Reservoir. Therefore, the road crossing and bridge will not be affected for some years to come.

The Department of Agriculture has also informed Mr. Hansell that it is planned to do some repair work on the existing bridge to keep it serviceable for a number of years.

## Handling of Stored Grain

Observations made throughout Southern Alberta during the present harvest season indicate that large quantities of this year's grain crop are being stored on the ground in the fields. The agricultural engineering staff of the Lethbridge Experimental Station have been watching storage piles during the past years, and to them it is evident that many of these piles are not sufficiently well-formed to withstand the possible rain or snow that can be expected at any time.

It has been observed that open piles must have smooth sides and a smooth uniform peak or ridge. Many of the piles now in the fields would be improved if they were brushed with a broom, or otherwise smoothed down to fill in depressions. Piles that are not located for natural drainage can be given added protection by the use of a small drainage channel designed to lead water around and away from the pile.

Field storage piles utilizing snow fence or other types of retaining walls need to be checked to ensure that water or melting snow cannot collect at the junction of the top of the fence or wall and the cone of grain inside the enclosure. Grain piles inside temporary enclosures are safer if filled to the point of overflowing, or if some form of waterproof covering is provided.

The possibility exists that some damp grain has been put into permanent storage buildings. Ventilation across the top of the bins is needed to carry away respired moisture arising out of the grain.

It is essential to check all grain for any signs of heating. Experimental evidence indicates that the moisture content of damp grain can be reduced only about one-half per cent by moving it from bin to bin several times. However, grain that is showing signs of heating can be cooled by moving it from bin to bin with a grain loader.

It is likely that a large part of this year's bumper crop will remain on the farms for some time. The care of stored grain has become a must in today's farming operations.

## "SWIFT" TO ATTACK WORLD AIR RECORD

A Supermarine Swift jet aircraft produced by Vickers-Armstrong Limited, and fitted with the latest version of the Rolls Royce Avon engine, plans to make an attempt on the world's air speed record from North Africa, before the end of this month. To beat the world speed record of 727.6 m.p.h. set up by Neville Duke in a Hawker Hunter, the Swift would have to do at least 734.8 m.p.h.—International Aviation Authorities will only recognize an improvement of at least one per cent on the previous best.

The pilot will be either Lieutenant-Commander Michael Lithgow, Supermarine chief test pilot, or David Morgan, his colleague. These two pilots burst through the sound barrier simultaneously at the Farnborough show this year.

## No September County Meetings

Due to the harvest season, there have been no meetings of the County Council or School Committee this month.

Complete reports of all County meetings will be carried in the Advocate as soon as they are held in October.

## Father of Local Man Passes

James Whiteside, pioneer of Nanton and Parkland, died at his home Sept. 14 in Claresholm at the age of 74.

He was born in Londonderry, North Ireland, and served during the Boer War. In 1909 he and his family came to Canada, settling first at Nanton, where he was town policeman for a number of years before taking up farming in the Parkland district.

Since retiring seven years ago he has lived in Claresholm.

Surviving are his wife, Rosina; five sons, Alex of Vulcan, David of Calgary, James of Turner Valley, Samuel of Stavely, and John of Claresholm; two daughters, Mrs. Charlotte Buck of Claresholm and Mrs. Mary Haynes of Ladner, B. C.; and 17 grandchildren.

Services were conducted by Rev. E. W. Oldring at St. John's Anglican Church, Thursday, Mrs. Gladys Bird was soloist. Pallbearers were Don Gaudette, Carl Johnson, Chas. Morland, Louis Schlosser, Jack Bowie and Frank Hutton.

Burial was in Claresholm cemetery.

## Vulcan Editor Named President Alberta Weeklies

R. C. R. (Bob) Munro, publisher of the Vulcan Advocate, was elected president of the Alberta Division of the Canadian Weekly Newspapers Association at the closing sessions of the Association's annual convention, held in Banff on Sept. 18-19. He succeeds Bert Ford of the Lacombe Globe.

Other officers elected were Fred Johns, Leduc, 1st vice-president; Hal Martin, Westlock, 2nd vice-president; Ken Patridge of the Camrose Canadian was again named secretary-treasurer.

Directors of the Alberta Division for 1953-54 are: William Bowes of Grande Prairie, Gordon Smith of Stony Plain, Charles Worton of Rimby and George Holmes of Provost.

During the convention, H. T. Halliwell, publisher of the Fort Macleod Gazette and pioneer Western Canada newspaperman, was presented with a life membership in the Association.

Hosts for various functions during the two-day convention were Calgary Power Ltd.; the Alberta Hotelmen's Association; McDermid Studios of Edmonton, Sears Ltd., Marton Bros. and Toronto Type machinery houses; the Canadian Petroleum Association and the Provincial Government.

The convention ended Saturday night, when the weekly newspaper men and their wives were guests of the Alberta Government at a reception and dinner, with Hon. A. J. Hooke, Minister of Public Works and Economic Affairs, as guest speaker.

## Canada Pays Its Share of U. N. Technical Aid

Canada has turned over to the United Nations the sum of \$800,000 as its contribution to the U.N. Expanded Program of Technical Assistance for 1953. Canada's contribution represents full payment of the amount it pledged for the current fiscal year. Here, Ambassador David M. Johnson, Permanent Representative of Canada to the United Nations (right) hands check to U.N. Secretary-General Dag Hammarskjöld. The program now operating in nearly 100 different countries and territories is already achieving effective results.

### Considerate

With the start of the shooting season, the usual irritating circumstances are bound to crop up between the too-eager hunters and farmers of the district who own the land on which the hunters seek to shoot.

Farmers become justifiably riled at the careless huntsmen who trespass on his land; leave gates open for stock to wander out onto road allowances; or leave large, open pits following the shoot.

Hunters should be civil enough, and appreciative enough of the rights of others to ask a farmer for permission to hunt on his land before invading his property. They should be careful at all times to close gates refrain from breaking down fences, and in general, act like one who is receiving a favor, and not giving it.

Hunting is an extremely popular fall past-time in this part of the country; but its popularity can exist only by the continued full co-operation which is so freely granted by the farmers themselves. To return this co-operation with damage and carelessness is to betray the rights of other hunters.

In short — hunters should enjoy their hunting, but not at the expense of others. —Lacombe Globe.

### Values Of Cadet Training

Cadet training for the young boys is invaluable. At first blush it would appear as though these camps would be for the express purpose of having a trained army should hostilities break out. This is one reason and a very sound one, for it is sheer murder when it comes to fighting trained men with untrained ones. Therefore, it is well to be prepared even though, and we hope, we may never need them.

This training is invaluable because each member of the group learns to participate and shoulder responsibility which aids in the development of each one of them as a citizen. Once a boy grows up and finds himself an adult member of society, the respective part he has to play is not found as difficult as for those who have had no such training.

There are never too many leaders whether it is for sports, community activities or actual battle. A trained man who knows how to work with a group is indispensable. All boys should be allowed to take this training whether it be with the army, airforce or navy. Experience gained in any one of these organizations will be a decided bearing on both themselves their communities or their country for all time to come.

A boy going into such a camp is taught what course of action to take when an emergency arises, and will learn how to delegate others during a crisis. Instead of looking for such excitement as is found in ordinary vandalism or the wearing of zootie suits as a uniform, the boys learn values of a far superior nature. They learn good sportsmanship and their energies are channelled in such a way as to bring out their capabilities, thus producing a useful citizen rather than a public nuisance or social detriment.

While some have the qualification for leadership, others make very good followers, and with proper training a good follower behind a good leader is forceful and effective.

Each year Canada selects the top grade cadets from across the Dominion and sends them to the Cadet Camp in Banff for an additional three week course where they gain experience which will amply qualify them to become leaders for the future.

—Banff Crag & Canyon.

### Trapping the Kilowatt for Mexico

Industry in Mexico, where the number of machines increases fast enough to swallow all available electricity, urgently needs the kilowatts which huge governmental hydroelectric developments are trapping. Shown here is the first hydroelectric plant of a system not far from the capital. A loan of \$26 million from the International Bank for Reconstruction and Development is helping to finance the construction of the system, destined to be a mainstay of new industry.

### How An Advertised Article Sold 15 to 1 Over An "Unknown"

Lit Brothers, Philadelphia department store, recently conducted a test to determine the selling power of advertising.

Simmons mattresses, a branded, advertised product sold 15 to 1 over identical mattresses bearing a fictitious brand label which was unknown to the public.

The store then lowered the price \$5 on the mattress with the fictitious label. Simmons mattresses still outsold the "unknown" mattress by 8 to 1.

Later a \$10 differential was imposed. Simmons mattresses still outsold the "unknown" by 14 to 13.

### Mr. Merchant . . Ask Yourself This Question

"Can I afford to operate a business which is 'unknown' and which sells 'unknown' products?"

Maybe your products are just as good; maybe your store is just as good—or even better—than others. But the Philadelphia department store found that customers don't spend their time in finding out about your store and your products.

The product which tells 'em is the one that sells 'em. And the store whose name is a household word, made so by constant, consistent and honest advertising is the one in "preferred position" by a score of 15 to 1.

Yes, good and honest advertising doesn't cost. It PAYS!

**FORD TRUCKING COSTS LESS!**

**Ford Trucks cost less to run!**  
Ford Economy Trucks save you money on every ton-mile of hauling—on any job you can name . . . because Fords have more time-saving, money-saving features than your trucking dollar ever bought before! Ford's great V-8 engines pack plenty of dependable performance for rugged hauling, while Power Pilot economy makes every gallon of gas go farther. Ford's Driverized Design—with shorter turning circles, greater maneuverability, easier steering, improved brakes and unmatched cab comfort—cuts operating costs to the bone!

**Ford Trucks cost less to maintain!**  
Ford Economy Trucks stay on the job faithfully, day after day, mile after mile. They work harder, last longer, keep repair and service costs to a minimum. Ford chassis construction, with new, sturdier deep-channel frames, provides more strength and rigidity without excess weight. Ford's big choice of Synchronic transmissions—plus Automatic Transmission\* or Overdrive\* available on all 1/2-ton models—give smooth, quiet operation and longer service! The extra strength built right into every truck part pays off in durability and long life!

## District News

### MOSSLEIGH

The Mossleigh Home and School Association held the first meeting of the season on Sept. 16 with the new president, Mr. C. Green in charge. Attendance was small owing to the busy season. There was some discussion of a workshop for Home and School to be held at Ranff, Oct. 19-23. It was left to the executive to try to find some person free to attend at that time. A system of parent-teacher conferences is to be tried this year instead of the regular set report cards.

After some discussion it was agreed to hold the long delayed amateur program on Friday, Nov. 13. Entries should be made to Mrs. W. Hagedorn, Mossleigh.

The prize for parent attendance at the meeting was won by Miss Hamner's room. Lunch was served by Mrs. Green and Mrs. Hagedorn.

### BERRYWATER

Mr. and Mrs. Howard Jurney were Calgary visitors the first of the week.

Mr. and Mrs. Leslie Richardson spent the weekend in Calgary, and while in the city attended the Alberta Artist Exhibition at Coste House and the Better Homes Exposition at the Corral.

Mr. and Mrs. Pete Hookoff of Calgary were Sunday guests at the Shkuratoff home.

The district was saddened to learn Sunday of the drowning of the small son of Mr. and Mrs. Johnny Thompson of Black Diamond. Mrs. Thompson is the former Miss Mickey Noble.

Miss Mildred Bownall of Calgary was a Sunday guest at the Jurney home.

Mrs. H. C. Douglass, Miss Gladys Baden and Mrs. W. Oldfield attended a FWUA meeting at Arrowwood Sept. 16, where Mrs. Douglass gave a most interesting demonstration on making flowers from wood fiber.

Mr. and Mrs. L. Jones have as their guests this week the latter's sister, Mrs. George Richardson and daughter of Victoria, B.C.

Mr. and Mrs. Ross Clifford of Calgary were overnight guests at the D. B. Smith home on Tuesday. Mr. and Mrs. Doug Smith, Karen and Douglas and Mr. and Mrs. Stan Wickstrom motored to Calgary Saturday and took in the exhibition of Better Homes at the Corral.

Bill Shkuratoff Sr. is the proud owner of a new Meteor car.

### KIRKCALDY

Mr. and Mrs. Stanley Bernard and Mary of Conrich, Alta. were weekend visitors at the Spencer Lewis home. They renewed acquaintances in the district.

Mr. and Mrs. John Bachman of Warner accompanied by their son-in-law and daughter, Cpl. and Mrs. Bruce Colwill and son were visitors at the home of Mr. and

Mrs. Evan Munro last week. Mrs. Colwill and Bobby are remaining at her sister's home for a longer stay while Cpl. Colwill went to Camp Borden.

Recent visitors at the Mallory and Carnegie homes were I. C. Keister and Mr. Prescott of Great Falls, Mont. The former was an old acquaintance of Grant Mallory. Mr. and Mrs. Morley Scobie and family motored to Cayley last Thursday evening to visit relatives.

Don Mallory motored to Calgary to see Buster last Wednesday.

Harry Hansen returned to Calgary on Sunday after spending several days in the district. He accompanied Mr. and Mrs. K. Carnegie who were visiting Buster.

Friends of Miss Marlene Urquhart are sorry to hear that she is confined to the local hospital. A speedy recovery is wished her.

### ENSIGN

Mr. and Mrs. Henry Hansen had as their guests on Sunday, the latter's father and brother, Bill McIndoe and George of Vauxhall.

Word has been received here of the death of an old time resident of the district, Mrs. Corrie Chapman, who passed away Sept. 6 at the age of 73 years. She was predeceased by her husband, Lorne Chapman in 1942. Since that time Mrs. Chapman has been making her home with her sister Mrs. Hartley in Glendale, Calif. The Chapman's farmed near Ensign and were recognized as some of the "old timers" in the district.

Congratulations are being extended to Mr. and Mrs. Jack Hunter on the birth of a daughter on Sunday in the High River hospital.

Calgary visitors the past week were Mr. and Mrs. B. Larsen, Myrna, Mrs. Brown, Mr. and Mrs. E. Hansen and Mr. and Mrs. Harold Bride.

The district was saddened to hear of the death of an old-timer, Bill Barton last week. Sympathy is being extended to Mrs. Barton in her loss.

Miss Jean Thorp resumed her studies at High River for another year.

Mrs. Kennedy and Lois and Mrs. Russel Markert were Lethbridge visitors on Saturday.

### RED CROSS

The regular meeting of the Sunshine Club was held at the home of Mrs. Howard Burrell on Thursday, Sept. 10 with an attendance of 13 members and three visitors.

The club welcomes one of the visitors as a new member.

Routine business matters were dealt with and it was decided to put on a tea and bake sale on Nov. 7 in the Legion Hall.

Mrs. Edith Dunham won the tea raffle and the next meeting will be held at the home of Mrs. Leon Coe.

Mr. and Mrs. Ed Love of Red Deer were recent supper guests at the home of Mr. and Mrs. Alva Love, while enroute to Great Falls to do some shopping.

Mr. and Mrs. C. Steiner of Calgary were district visitors last week while here they were getting in a little duck shooting.

Miller White observed his 73rd birthday Saturday with a family dinner at his home. Many happy returns are wished him by his many friends throughout the district.

Friends of Mr. Giles will be glad to learn that he has returned home after spending some time in Excelsior Springs, Missouri.

Dr. Hess and Mrs. Hess and Dr. Hess' father of High River were recent guests at the home of Miller White.

Mr. and Mrs. Benny Kombeitz of Grassy Lake and Mrs. Montgomery of Taber were visitors on Tuesday at the home of Mr. and Mrs. Alvin Jacobson.

Clare Dunham was a Calgary visitor this week.

Mr. and Mrs. J. P. Methers of Calgary and Mrs. W. Buxton were weekend guests at the home of Mr. and Mrs. Bert Methers.

### THISTLES

Keep under those thistles, advises G. R. Sterling, Supervisor of Soil Conservation Weed Control, Alberta Department of Agriculture. That the season has been wet and work on the summerfallow interrupted is no excuse for neglect during the remainder of the year. Much good work can be done between now and freeze-up, but the work must be thorough.

Cultivation should be shallow but all thistle growth should be cut. How often to cut will depend on rate of growth. With ample moisture and good growth, cultivation every ten days may be required.

Don't let the plants grow more than a couple of inches above the ground before cultivation. Mr. Sterling advises. To that height they are using up the food supplies in the roots. After a height of two inches the plants start again to store reserves.

### WHY NOT IRRIGATE YOUR TREES?

Most authorities agree that trees growing under favourable conditions are much less subject to winter injury, ill effects from insects, diseases, etc., than those struggling for an existence.

Trees on a prairie farm should be considered a permanent asset and every effort should be made to keep them in a healthy, vigorous state. There is no more effective way of doing this, says John Walker, Superintendent, Forest Nursery Station, Indian Head, Sask., than by the application of irrigation water.

No extensive or elaborate system for collecting and applying water to shelterbelt trees is required. Advice and help in excavating a dugout or in damming a creek whereby sufficient spring "melt" water may be impounded is available from local government agencies.

Trees do not require a lot of water in addition to rainfall, to insure their making substantial annual growth; to survive dry, hot summer days; to recover from insect attacks; and to be equipped with sufficient systematic water to withstand the prolonged, and often severe prairie winter.

In most districts irrigating trees at two seasons of the year only should be necessary. First, a heavy application in early July helps to extend vigorous annual development; second, when fall rains are sparse the ability of trees to survive the winter is improved by irrigating them just before freeze-up.

If equipment for sprinkler irrigation is to be used the slope of land where trees are planted is not important. Where flood irrigation is to be practised the land must be reasonably and uniformly level or gently sloping. In the latter method the water must be pumped to the highest point for distribution by gravity.

Farmers do well to consider their trees deserving of additional water so that maximum development may result year after year. The specific periods of the year suggested for applying this water are perhaps the slackest on the average farm.

### WARNING NOTICE

Vulcan County is a Pest Control Area and some of the farms are posted, warning of Cyanide Guns being set. Some of these signs are becoming faded due to weather, therefore extreme care should be used by hunters and others wherever these signs are on the land.

These posters have nothing to do with the ordinary "No Shooting" signs found on some farms.

## INSTALL AN IRON FIREMAN PROPANE BURNER

You needn't throw away a good furnace in order to have efficient propane heating. The Iron Fireman Radiant propane burner was designed especially for use in coal fired furnaces and boilers without sacrificing efficiency and fuel economy. The radiant, sealed hearth, with light weight refractory combustion chamber, become radiantly incandescent like a gas mantle. Heat release is the same as from a glowing coal bed for which your furnace was designed, making this the most economical propane burner you can install. There are thousands of enthusiastic owners in all propane burning areas of Canada.

## Carmangay

Mrs. Blanche Bond of High River is visiting at the home of her daughter and son-in-law, Mr. and Mrs. W. F. Ewing.

Tim Burns of Great Falls, Mont. was a guest over the Labor Day holiday at the home of Mr. and Mrs. Carlton Burke.

Miss Shirley Service spent last weekend in Lethbridge.

Mr. and Mrs. Clarence White and sons of Nanton were Sunday guests at the home of Mr. and Mrs. Einar Dahl.

Mrs. Mary McVinnie of Vancouver, B.C. is a guest at the home of Mr. and Mrs. Tom Hovde.

Congratulations to Mr. and Mrs. Mac Baldwin on the birth of a daughter, Glenda Mary Anne, Wednesday, Sept. 16.

Ralph Clark of Creston, B.C. is visiting at the home of his son and daughter-in-law, Mr. and Mrs. Dale Clark until after harvest.

Miss June Volk of Calgary spent the weekend at home.

Mr. and Mrs. Leonard Teskey and sons spent Friday with Mr. and Mrs. Ray Teskey. They are enroute to their new home in Penhold.

Jim Korth and Bright Robertson accompanied by Henry Korth of Lethbridge spent the weekend trout fishing and reported a good catch.

Mr. and Mrs. Bert Graff are visiting at the home of the latter's parents, Mr. and Mrs. Jim Fraser. They are on their way to Portage la Prairie where Mr. Graff is now stationed with the R.C.A.F.

Mrs. Frank Eurker and daughter of Vancouver, B.C., are visiting at the home of Mr. and Mrs. Frank Hauser.

Mr. and Mrs. Robert Ward and the latter's mother, Mrs. Maloney of Toppenish, Wash., are visiting

at the home of Mr. and Mrs. Harold Hovde.

Miss Charlotte Egger of Nanton is a guest at the home of Mr. and Mrs. Ed Stettner.

Mrs. C. Hovde is visiting at the home of Mr. and Mrs. Clarence White at Nanton.

Mr. and Mrs. Frank Hauser and Mrs. Eurker spent Sunday visiting with relatives in Calgary.

Congratulations to Mr. and Mrs. W. F. Ewing on the birth of a daughter, Patricia Anne, Monday, Sept. 21 in the local hospital.

Hospital patients this week were Mrs. Nelson, Mrs. Ramsay, Mrs. Steeves, Mrs. Krasman, Mrs. Baldwin and baby, Mrs. Schoonover, Linda Gorzita, Mr. Lyckman, Mr. Lud, Mr. Alternatt and Mr. Raiz.

Miss Agnes Szekely is attending school at the Sacred Heart Convent in Calgary.

Miss Hutchinson of Toronto is a guest at the home of Mr. and Mrs. V. Teskey. She is visiting her brother, George Hutchinson and other friends in the district.

Miss Betty Hammer arrived Monday to take up teaching duties in the local school. She was unable to attend the first week of school due to illness, and Mrs. V. Teskey substituted for her.

### Missionary Society

The Missionary Society held the regular meeting on Wednesday, Sept. 16 at the home of Mrs. Bill Moore with 12 members present.

The afternoon was spent preparing clothing for a parcel which will be sent to Mr. and Mrs. Cecil Norton in India.

Members will begin making a quilt at the next meeting which will be held on Oct. 21 at the home of Mrs. W. Ruggles.

### Carmangay Hospital Auxiliary

The September meeting of the Hospital Auxiliary was held in the town office on Thursday, Sept. 17, with eight members and one visitor present.

Reports were given on purchases made during the month. Several improvements have been made in the nurses home. The home has been supplied with new sheets and new linoleum has been purchased for the hall and bathroom. Members have reupholstered the hostess chair and the hospital board has arranged to have the chesfield and two chairs recovered. It was decided that a chest of drawers be purchased for the home as soon as possible. The ladies have also hung new blinds and curtains in the dining room of the hospital.

Plans were made for a bake sale to be held in the town office Oct. 3 at 7:00 p.m.

The next meeting will be held on Oct. 15 in the town office.

### West Country Women's Club

The first fall meeting of the West Country Women's Club was held at the home of Mrs. Vivian McFarland on Wednesday, Sept. 16 with 10 members present.

Members discussed the possibility of holding a Halloween party and a committee was appointed to make further plans.

The next meeting will be held at the home of Mrs. Gladys McGinnis on Oct. 7.

After the meeting a delicious lunch was served by the hostess, assisted by Mrs. Florence McLeod.

### North Priscilla Club

The first August meeting of the North Priscilla Club was held at the home of Mrs. Connie Stettner with 10 members present.

Mrs. John Hurnanen had been presented with a cup and saucer, while a patient in the hospital.

It was decided to purchase a dinner set for twelve for the W.A. At the close of the business meeting, bingo was enjoyed with Mrs. Alta Hauser winning. Mrs. Lydia Anderson won the raffle.

A tasty lunch was served by the hostess assisted by other members.

The second August meeting was held at the home of Mrs. Martha Nelson with 11 members and five visitors present.

Roll call was answered with their favorite pickle recipe. For the next meeting members are to bring cushions or cushion tops for the local hospital. A get well card was signed by all members and visitors and sent to Aksel Wennes, a patient in the Galt hospital.

Court whist was then enjoyed with Mrs. Edith Church winning high and Mrs. Lydia Anderson low. Mrs. Anderson also won the raffle again.

A tasty lunch was served by the hostess assisted by other members.

### School Opening

School opened on Monday, Sept. 14 with 179 students registering for classes. There are 17 beginners and eight new pupils who have moved into the district.

Teachers are: Grade 1, Miss Audrey Burns; Grades 2 and 3, Miss Betty Hammer; Grades 4 and 5,

Miss Irene Hilt; Grades 5 and 6, Miss Marjory Reath; Grades 7 and 8, Mrs. H. Whittle.

High School teachers are: Principal, Mr. F. M. Yocmans; Assistant, Miss Edith Reavley; Home Economics, Miss Louise Giacchetta; Industrial Arts, Mrs. H. V. Christian.

Newcomers to the staff this year are Miss Burns, Miss Reath, Miss Reavley, Miss Giacchetta and Mr. Christiansen.

Swings and the slide have been moved to their new locations and a new bicycle rack has been built.

## With The District Agriculturist

Hugh Michael

### After Harvest Tillage

The following information is taken from results published by the Dominion Experimental Station at Lethbridge some time ago.

"The effect of after-harvest tillage on subsequent grain crops has been under test at the Lethbridge Experimental Station for a number of years. Blading, oneway disking and basin listing have been the after-harvest practices compared with no tillage treatment. The twelve year average yield of crops grown on untreated stubble fields has been 14.3 bushels per acre. This compares with an average yield of 15.7 bushels per acre from crops grown on stubble bladed the previous fall. Yields for the other treatments did not differ greatly from that obtained on untreated stubbles.

There are two possible reasons for the yield differences obtained, namely: the control of weeds and increased moisture conservation. Since both the blading and the oneway disking have resulted in a comparable measure of weed control it is thought that the yield difference is due mostly to superior moisture conservation effected by blading which retains a good, well anchored trash cover on the soil surface. Doubtless the blading opens up the soil, as does the oneway disking which allows for a possible increased intake of moisture, but in addition the standing stubble on the bladed fields is able to hold more of the winter snow.

For the most effective working of stubble, the job should be done as soon as possible after the crop is removed. This statement applies particularly to the control of Russian thistle by fall cultivation."

Canada thistle is a problem on a great number of farms in Southern Alberta at the present time. The fall is usually a critical period for their control as far as cultural control methods are concerned. Too often the summerfallow is well taken care of until harvest time arrives, and then is neglected due to the pressure of harvesting. However, if a good job is to be done in eradicating Canada thistle cultivation must be continued until freeze-up.

## GMC Heavy Duty Trucks

Check the items below — they show that GMC is the best truck buy you can make.

- DRIVER-CONDITIONED CABS — outstanding for comfort and value. Emphasis is placed on a wide, roomy, comfortable interior with full-width seat cushions and easy-access doors and controls.
- VENTI-PANES — draft-free or forced ventilation as you desire.
- ADJUSTABLE SEAT — large or small, it suits 'em all. Fingertip control. As it moves forward, seat rises and back tilts for maximum driver comfort.
- MORE POWER — the Loadmaster's husky 108 h. p. at 3600 r.p.m. gives more power per fuel gallon than other engines of comparable size and rating.
- FULL-PRESSURE LUBRICATION — to all camshaft, main and connecting-rod bearings.
- DIAPHRAGM CLUTCH — engages smoothly and silently with minimum pedal effort. Simple design with fewer parts greatly reduce service costs.
- RECIRCULATING BALL STEERING — scores of steel balls rolling freely between worm and nut virtually eliminate friction.
- FOUR-SPEED SYNCHRO-MESH TRANSMISSIONS — standard equipment on all Heavy Duty GMC Trucks.
- HYPOID REAR AXLE or OPTIONAL 2-SPEED REAR AXLE with power shift.
- HYDRAULIC SERVICE BRAKES — Twin-Action Rear Brakes and torque-action front brakes. Maximum control and braking power.
- HYDROVAC BOOSTER — all these trucks equipped with Hydrovac booster which reduces pedal effort by doing two-thirds of the work when brakes are applied.

## Safety Hints On Tractor Operations

1. STOP your Tractor and field work for 10 or 15 minutes each morning and afternoon.
2. Reduce fatigue and restore energy with a light lunch in afternoons.
3. Keep Tractor speed below 4 miles per hour for off-the-road operations.
4. Do not try to relieve fatigue by operating Tractor in standing Position — Stop and rest.

### Maybe you should cut this ribbon!

Of course, when a new bridge or highway is completed, it's traditional for some prominent citizen or government official to cut the ribbon in the opening ceremony. And yet...

Often this honour might be awarded with good reason to any one of the nation's life insurance policyholders.

Why should they deserve this distinction?

Because it is their premium money, part of which is invested

for them by life insurance companies, which makes it possible to build many such useful public works. Not only roads and bridges, but electrical power stations, waterworks, stores, homes, office buildings and industrial plants are built with the help of life insurance dollars.

So here's to the life insurance policyholders! While they provide financial security for their families and themselves, they also help make Canada a better land to live in!

#### AT YOUR SERVICE!

A trained life underwriter — representing one of the more than 50 Canadian, British and United States life insurance companies in Canada — will gladly help you plan for your family's security and your own needs in later years. Rely on him!

**THE LIFE INSURANCE COMPANIES IN CANADA**

## District News

### BRANT

Mr. and Mrs. B. F. Sellars returned home Tuesday after a two week holiday spent in Montana, Idaho, Washington and B. C.

Mrs. Dorothy Pearson and family arrived home after spending 10 days visiting her sister, Mrs. Johnstone in Piepot, Sask.

Mr. and Mrs. McKeage, Marlene and Garry are spending a few days visiting in U.S.A.

Mrs. George Kent and daughter from Rossland, B. C. are spending a few days visiting Mrs. Dorothy Pearson.

Wm. Jensen was home for the weekend from Skiff, Alta.

Danney Watson is sporting a new Pontiac.

Mr. and Mrs. Don Schultz and boys left for Kimberley, B. C. to visit Mrs. Schultz's brother and family and expect to bring Mrs. Schultz's father back with them.

Ladies Aid was held at the home of Mrs. B. Prater on Thursday afternoon with 11 members present. Tentative plans were made for tea and bake sale this fall.

Brant school opened on the 14th of September with a complete new staff of teachers. They are William Davis from Saskatchewan as principal, Mrs. McAllister from High River; Miss Lois Kennedy from Ensign; Mrs. Wilson from Calgary and Miss Hanna from Vulcan.

The Home and School Association will resume meetings for the 1953-54 season on Sept. 23. Feature theme of the meeting to be a welcome to the teachers. Guest speaker will be Mrs. Lorne Fray of High River. All interested are welcome to attend.

Congratulations are extended to Mr. and Mrs. G. Ferguson on the birth of a son, borne Monday Aug. 17.

Miss Shirley Sellars is home from Lake Louise where she spent the past two months working at Deer Lodge.

The Catholic Women's League met on Sept. 17 at the home of Mrs. Gallagher with 12 members and two visitors present. The meeting opened with the usual prayer,

roll call and minutes of last meeting. Mrs. Gallagher reported that the Lacombe Home would be most grateful for any fruits or vegetables we would care to donate. Members moved that they would bring their donations to the Gallagher farm, G. Ferguson having offered to truck them to Midnapore. Mrs. Emmelkamp reported on the cost of Christmas cards and the profit to be made on them. A large club order is to be sent for these. The Secretary, Mrs. C. Rhodes, was instructed to purchase a mass card to be sent to Mrs. E. Archambault of Calgary, whose husband recently passed away.

Some plans were made for the fall bazaar with conveners chosen for the various sections. Following the business meeting a group discussion was held on "Sex Education of Children". This talk was capably led by Mrs. A. Gingrass and Mrs. Emmelkamp and proved very informative. Mrs. Druhal offered her home for the next meeting. After lunch the draw was made for the hostess gift and Mrs. G. Fiebotte was the winner.

Wm. Jensen is home for the time being. He was employed with the Alberta Wheat Pool at Seven Persons.

Miss Alberta Prusky from Red Deer spent two days this week visiting her mother in Brant.

Misses Wilma Burley, Arlene Bell are home for the weekend.

Miss Arlene Parker left for Mount Royal College in Calgary last week where she will take her grade 12.

Mrs. Agnes Neff from San Francisco was visiting her sister, Mrs. Ruth Hamilton.

Mr. and Mrs. Holdan, old timers of Brant, celebrated their 54th wedding anniversary in Calgary on Sept. 4.

### ALSTON

Miss Norma Jane Warren has been a patient in the Vulcan hospital for the past few days.

Mr. and Mrs. C. Beingsner and son, Earl of McNab were weekend visitors at the home of Mr. Beingsner's parents, Mr. and Mrs. S. Leingessner.

Last week Mr. and Mrs. J. Hagerman of Calgary were in the district attending to farming interests and visiting with Mr. Hagerman's sister, Mrs. Annie Clements.

On Sunday a birthday dinner was held at the home of Mr. and Mrs. R. Flitton in honor of Mrs. Flitton's mother, Mrs. W. Ohler of Carmangay. Among those present were Mr. and Mrs. A. Cutforth and family of Vulcan and Mr. and Mrs. I. Ohler and family of Carmangay.

Mr. and Mrs. L. Gibson of Parkland were Sunday guests of Mr. and Mrs. J. Middleton and family. Friends of Mr. and Mrs. R. Beingsner of Calgary will be interested to learn that their daughter Doreen who recently contracted polio is now home and well on the way to recovery.

Dinner guests at the home of Mr. and Mrs. I. Iverson on Sunday were Mr. and Mrs. C. Beingsner and Earl of McNab. Sunday visitors at the home of Mr. and Mrs. F. Strauss were Frank Fisher, Tony Strauss and Lawrence Steffler, all of Formosa, Ont., and Mr. and Mrs. W. Heidmiller and son of Stavelly.

August Seigle of Calgary was a visitor in the district last week. Miss Shirley Hubbard of Vulcan who had the misfortune to catch the mumps spent last week convalescing at the home of her parents, Mr. and Mrs. R. Hubbard.

H. Gano of Madden was a week end guest at the Roger Hubbard home. Mr. and Mrs. D. Neilson of Taylorville spent the Sunday with Mrs. Elva Smith and family.

Mr. and Mrs. D. Neilson of Taylorville spent the Sunday with Mrs. Elva Smith and family.

# Roadmaster... Super... Custom...

3 Great BUICKS...

and even the Price is a Pleasure

### The Roadmaster

The lordly Roadmaster, with a brilliant new 133-h.p. V-8 Fireball engine. Sensational Twin-Turbine Dynaflo Drive is standard on Roadmaster. Buick Power Steering, standard on Roadmaster, is optional at extra cost on other series. Buick Power Brakes are extra cost options on Roadmasters and Supers.

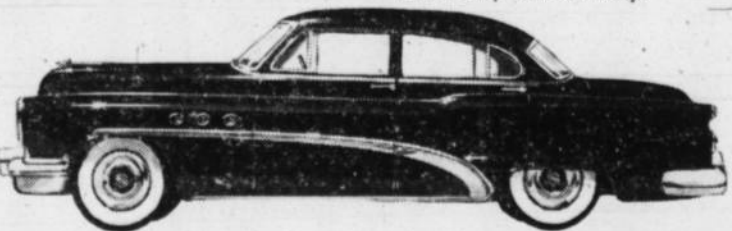

### The Super

You'll find Buick Super power outstanding—more spirited, more thrilling, thanks to Buick's great new V-8 Fireball engine. Its ride is outstanding, too—level and steady and lullaby-soft. This handsome Buick brings you quality that far oversteps the usual confines of the medium-price field. Visit your dealer today!

### The Custom

There's a big story in what you get for the price of this beauty! You get the highest horsepower ever engineered into the Custom series! You get big-car comfort and roominess! You get the sweet handling of the Million Dollar Ride. All this for only a few dollars more than many cars in the "low-price" field!

**Milo News****CORRESPONDENT WANTED**

The Advocate is anxious to secure a news correspondent for the Milo district. Anyone interested is asked to write the Editor, Vulcan Advocate, for further information.

**Milo Home and School**

The Milo Home and School Association held their first general meeting on Wednesday, Sept. 16 at the school with our new president, Mrs. Ross Bertrand in the chair. There were some 70 people present including teachers and a few visitors. The membership tea was a huge success under the capable management of our Social Convener and her committee. The secretary, Mrs. R. Glaze, reports some 52 new members enrolled this day. This is a fine start for the first meeting. Tom Clarke, principal, introduced the staff for the coming year, and we were fortunate this day in having the Home Economics teacher Miss Giacchetta with us and also the shopwork instructor, Mr. Christanson. We were all very glad to have this opportunity in meeting the entire staff. The school enrolment this year stands at some 211 pupils with 31 begin-

ners. Mothers of the new beginners that were present were also introduced to the audience by Mrs. N. McCord and we hope you new members who are attending Home and School meetings for the first time will derive as much pleasure out of these meetings as our older members have. Mrs. L. Monner presented the past president's pin to Mrs. J. L. Desharnais.

The next general meeting will be held on Friday, Oct. 16 at 8:00 p.m. at the school.

This being a month set aside for consideration of the work of the United Nations, the program committee have invited the four young students from Nanton, who in the past attended the United Nations meet. We are very fortunate in having these young students to come to Milo and speak to us. The date is Friday, Oct. 16 at 8:00 p.m. Everybody is welcome to come. Whether you have school children or not; whether you are a member of Home and School or not, you are all welcome to come. A special invitation goes out at this time to the Milo Students Union. This should prove to be very interesting to you young students. The next executive meeting for executive members on Thursday, Oct. 1 at 8:00 p.m. at the home of Mrs. J. L. Desharnais.

**John Ware--Famous Cowboy**

(Continued from Front Page)

plants in the Eastern states. Other great herds were driven into the then practically unknown great North West and the Northern Pacific states and the Canadian North West Territories of Alberta and Saskatchewan (now Saskatchewan).

Eventually John Ware drifted into Eastern Oregon, where many ranches had started up and running. A drifting cowboy as he was, his life was dangerously lived, but his great strength and riding ability held his job where ever he was, and looking for new and greener pastures, fate brought him up into Canada, where he was to live out his life fully.

There are so many authentic stories of his prowess in the saddle of his great personal courage in difficult places, his deeds would warrant a hero's niche in any hall of fame now-a-days, but the all important ideal in his every day life was to do the right thing, by those who hired his services, giving of his best for the common cause, in all undertakings.

After about ten years of loyal service to the Bar U ranch, John drifted again to Sheep Creek, west of Dewdney (now Okotoks) at Millarville, where he started up a ranch of his own, this was along about 1891. The following year he married Mildred Lewis in Calgary, who had arrived in the West recently and lived with her parents near Shepard on a farm close to the growing city.

Mrs. John Ware's father, Daniel Lewis, was Canadian born and had brought his wife and part of his young family of seven children to Shepard, having lost three prior to migrating Westward, in the east.

One of his sons stayed behind in Ontario, but another son Spencer came with the rest to the prairie settlement, he was nine years old when he first saw and marvelled at the wondrous Rockies, which appeared so near and yet were so far, the intervening vista a sea of billowing grass, a wild and wonderful landscape.

After his schooling his great desire was to see the world from the deck of a cayuse, so to achieve his desire he joined a round-up crew in the neighborhood and worked ever south towards the border country, riding for many large outfits.

Later he ventured up the Crows Nest pass into British Columbia, then given over to cattle ranching and hard rock mining, and other frontier pursuits.

He located for a time near Cranbrook and Fort Steele, up in the Columbia Valley. Returning later he took up wheat farming South West of Vulcan, in Alberta doing his own work and helped by his two nieces, the daughters of his brother-in-law, John Ware, in the person of Janet and Mildred Ware, who take care of his house and tend the chickens, turkeys, and darn his socks and so forth as Spencer never married, he is a highly respected neighbour to the farmers close by, appreciated by all for his sterling character and quiet humour.

Following John Ware bringing home his bride to the Millarville ranch, a daughter was presented to the happy father in Janet, mentioned above, and now universally known by her nick name "Nettie"—following her were a son Bob, then Willie, Mildred and Arthur.

When the first world war opened in Europe, two of the boys donned the King's uniform in the Canadian Army and saw service overseas in France. Willie was in-

validated home with war wounds and later died in the Keith Sanatorium and Arthur, the other soldier, now returned to civil life, carried on.

Bob and Arthur work with the railroad as pullman porters, the former's run from Calgary to Nelson, B.C. and Arthur, from Vancouver to Penticton, B.C.

Around the turn of the century John and Mildred Ware, with their family, pulled up stakes at Millarville and moved again to the Red Deer country, north of Brooks where they took up ranching, their home ranch located in a coulee, which still bears the name of Ware Coulee on most maps of the district.

At this location another son was born to them, in Daniel, a youngster who did not seem to have the family robustness, and he died suddenly in infancy when but two and a half years old; the first heartbreak for the family. Neighbours were few and far between up in that open range land, so that the few thereabout within reach were always welcome on the lone prairie. It was still a grand ranching country as the land hungry homesteaders had not as yet arrived to over run the face of Old Mother Earth.

Early in 1905 John lost his wife, this second tragedy worked a severe hardship on the widower and his young family, away out and beyond, and as trouble always seems to come in bunches, the following September, the 11th day thereof, John Ware was killed through his saddle horse hitting a badgerhole and falling on its rider. This day was being celebrated as Uncle Spencer's birthday—The sorrowing family was then taken from the ranch to live with their Granny in Calgary, who raised them and cared for them. After having ridden thousands of wild, untamed horses to be killed by a gentle saddle horse was an enigma not easy to fathom.

At the recent George Lane Memorial Park dedications, during the High River Rodeo, hundreds of old timers and their descendants, came to pay their respects to George Lane's widow and her children, who had also gathered from East and West to honor her, and her famous husband, and the old Bar U ranch, which he had later owned and operated, it was a fitting gesture to pay humble respects to and be introduced to some of the original hands still living, and their descendants, whose courage and vision in those early days, made the great ranch what it finally became—the headquarters of the biggest Percheron ranch in the world, known where ever horses of class and highest breeding were marketable.

Amongst those present excluding the original ranch hands, were some of their descendants, which included Janet, Mildred and Bob Ware, together with their uncle, Spencer Lewis.

An heirloom, stored in all reverence down through the years was John Ware's riding gear, his much used stock saddle, spurs, and his trusty .44 six shooter and holster and belt. Laid away partly forgotten, from the light of day and old, time memories of little or no interest to others but the immediate family, has been turned over as a gift to the curators of the City of Calgary museum, where it will be placed on display, for all to see.

In the future, those who still remember the old days as they were in colorful panorama, this relic will bring back those memories of our Old West when the country was young and history
